

Servicing your vehicle while under warranty

You **DO have a choice when it comes to servicing your new vehicle.**

Talk to us about servicing your new vehicle, *without endangering the manufacturer's warranty.*

If we are unable to do the work to the standard required then we'll tell you.

So the choice is **yours!**

Issued by the Automobile Repairs Division of VACC

Are you paying too much for your Car Service?

New Car Franchise Dealers do not have a monopoly on "Log Book" Servicing.

If you're concerned about preserving your new car's statutory warranty but also want to obtain expert service at competitive rates, South Coast Auto Services can help.

We can service your new vehicle - We can also carry out manufacturer's hand book services and validate your service book. Your new car warranty will be validated and protected.

No Need To Worry About Your Warranty!

If your car is still within its warranty, this is the choice for you.

South Coast Auto Services uses manufacturer service schedules in order to ensure that we are offering you the correct service for your vehicle's needs.

All the parts supplied are compliant with your manufacturer service schedules and therefore ensure that your warranty remains intact.

This is possible thanks to the Block Exemption Regulations, which were put in place to ensure that main dealerships were no longer to have a monopoly on the car servicing industry.

However, if your car is no longer covered by a manufacturer's warranty and you would rather opt for a standard service, check out our equally comprehensive Full Service.

Full Manufacturer Scheduled Service

A 'Full Manufacturer Scheduled Service' is one which the vehicle manufacturer would suggest you take and is based on the specific age and mileage of your vehicle. This recommendation comes from extensive research carried out by the manufacturer.

The research focuses on how their vehicles will age over time. It is this research that puts them

in the best position to advise you on what will need to be checked and replaced as your vehicles age.

What Make This Different From a Full Service??

In a Full Service there are a set number of checks that are carried out no matter what vehicle you have. This means that the service you receive is not unique to your vehicle and its current condition or age.

With a Full Manufacturer Scheduled Service, this is not the case - no two services are the same.

You Won't Be Disappointed

Since a Full Manufacturer Scheduled Service follows the recommendations set out in the manufacturer's handbook, you can rest assured that you will receive a truly high-quality service from qualified mechanics, all at a low competitive price. For more information [Click Here](#) .
