

Fluidrive® Service Centres have been rebuilding and specialising in automatic transmissions since 1963. With today's motorcars, having a transmission overhauled is a major expense and inconvenience to most people. Fluidrive's® philosophy is to build it right the first time by only using quality parts and doing the job properly. We don't take short cuts to save a few dollars and we only use parts that meet the manufacturer's specifications.

This means our customers can be sure they are getting quality work from a repairer they can trust.

And, having been around since 1963, in the unlikely event that you experience any further problems, you can be sure we will be there to stand behind our warranty. For more information [Click Here](#)
